

'Soil my undies' test (optional)

CaSTCo

Making sure that people count at
the heart of rivers' recovery

Based on the USDA's 'bury your undies' test.

Bury and wait

- 01** Bury a pair of new cotton underwear, about 6 inches deep with the waistband showing above the surface. Wait for 60 days.
- 02** Dig up the underwear and take a photo, upload to the Vidacycle app.
- 03** The more degraded the pants are, the more biological activity there is likely to be in the soil.
